- Bačkor M., Ivanova V., Laatsch H., Lokajová V. & Bačkorová M. (2013): Allelopathic effects of lichen secondary metabolites on lichen photobiont *Trebouxia erici*. – *Allelopathy Journal* 31: 189–198.
- Černajová I. & Svoboda D. (2014): Lichen compounds of common epiphytic Parmeliaceae species deter gastropods both in laboratory and in Central European temperate forests. – *Fungal Ecology* 11: 8–16.
- Fabriciová G., Lopez-Tobar E., Vega Canamares M., Bačkor M. & Sanchez-Cortes S. (2012): Adsorption of the anthraquinone drug parietin on silver nanoparticles: A SERS and fluorescence study. – *Vibrational Spectroscopy* 63: 477–484.
- Fačkovcová Z. (2013): Príspevok k poznaniu lišajníkov karbonátových podkladov Považského Inovca [Contribution to the knowledge of lichens of carbonate substrates in Považský Inovec Mts]. – *Bryonora* 52: 1–21.
- Flakus A., Sipman H. J. M., Bach K., Rodriguez Flakus P., Knudsen K., Ahti T., Schiefelbein U., Palice Z., Jabłońska A., Oset M., Meneses Q. R. I. & Kukwa M. (2013): Contribution to the knowledge of the lichen biota of Bolivia. 5. – *Polish Botanical Journal* 58: 697–733.
- Guttová A., Zozomová-Lihová J., Timdal E., Kučera J., Slovák M., Píknová K. & Paoli L. (2014): First insights into genetic diversity and relationships of European taxa of *Solenopsora* (Catillariaceae, Ascomycota) with implications for their delimitation. – *Botanical Journal of the Linnean Society* 176: 203–223.
- Guttová A. & Lackovičová A. (2014): Zaujímavější floristické nálezy. – *Bulletin Slovenskej botanickej spoločnosti* 36: 255–257.
- Halda J. P. (2014): Lišejníky NPP Babiččino údolí [Lichens of the Babiččino údolí national natural monument (East Bohemia)]. – *Orlické hory a Podorlicko* 20: 281–311.
- Halda J. P., Kotlík P. & Štaffen Z. (2014): Biologické napadení kamene soch a reliéfů v Novém lese u Kuksu a možnosti jeho potlačení. – *Zprávy památkové péče* 73: 536–542.
- Halici M. G., Vondrák J., Demirel R., Ceylan A. & Candan M. (2014): Teloschistaceae (lichenized Ascomycetes) in Turkey II. – Some poorly known taxa. Supported by molecular data. – *Nova Hedwigia* 98: 449–458.
- Horák J., Vodka Š., Kout J., Halda J. P., Bogusch P. & Pech P. (2014): Biodiversity of most dead wood-dependent organisms in thermophilic temperate oak woodlands thrives on diversity of open landscape structures. – *Forest Ecology and Management* 315: 80–85.
- Knudsen K., Breuss O. & Kocourková J. (2014): A new lichenicolous *Heteroplacidium* (Verrucariaceae) from the deserts of southern California. – *Opuscula Philolichenum* 13: 26–33.
- Knudsen K. & Kocourková J. (2014): A new species of *Lecidea* (Lecideaceae, Lichenized Ascomycetes) from the mountains of California. – *Opuscula Philolichenum* 13: 80–83.

- Knudsen K. & Kocourková J. (2014): Notes on the California lichen flora 6: New records. – *Opuscula Philolichenum* 13: 4–7.
- Knudsen K., Kocourková J. & Nordin A. (2014): Conspicuous similarity hides diversity in the *Acarospora badiofusca* group (Acarosporaceae). – *Bryologist* 117: 319–328.
- Kováčik J., Klejdus B., Bačkor M., Štork F. & Hedbavny J. (2011): Physiological responses of root-less epiphytic plants to acid rain. – *Ecotoxicology* 20: 348–357.
- Kováčik J., Klejdus B., Štork F., Hedbavny J. & Bačkor M. (2011): Comparison of methyl jasmonate and cadmium effect on selected physiological parameters in *Scenedesmus quadricauda* (Chlorophyta, Chlorophyceae). – *Journal of Phycology* 47: 1044–1049.
- Kubásek J. & Vondrák J. (2014): Živoucí kameny mezi lišejníky. – *Vesmír* 93: 578–581.
- Lhotský J. (2014): Muž, který stvořil lišejníky, Simon Schwendener (1829–1919). – *Vesmír* 93: 582–583.
- Liška J. (2013): Česká a slovenská lichenologická bibliografie XXVI [Czech and Slovak lichenological bibliography, XXVI]. – *Bryonora* 52: 43–45.
- Lokajová V., Bačkorová M. & Bačkor M. (2014): Allelopathic effects of lichen secondary metabolites and their naturally occurring mixtures on cultures of aposymbiotically grown lichen photobiont *Trebouxia erici* (Chlorophyta). – *South African Journal of Botany* 93: 86–91.
- Maliček J. (2013): Zajímavé nálezy lišejníků v Brdech. – *Erica* 20: 67–101.
- Maliček J. (2014): A revision of the epiphytic species of the *Lecanora subfusca* group (Lecanoraceae, Ascomycota) in the Czech Republic. – *Lichenologist* 46: 489–513.
- Maliček J. & Kocourková J. (2014): Lišejníky chráněných území Na Babě a Vraní skála na Křivoklátsku [Lichens of protected areas Na Babě and Vraní skála in the Křivoklát region (Central Bohemia)]. – *Bryonora* 53: 1–15.
- Maliček J. & Palice Z. (2013): Lichens of the virgin forest reserve Žofínský prales (Czech Republic) and surrounding woodlands. – *Herzogia* 26: 253–292.
- Maliček J. & Vondrák J. (2014): Příspěvek k poznání lichenoflóry Rašeliniště Jizery a Rašeliniště Jizerky [Contribution to the knowledge of lichen flora of Rašeliniště Jizery and Rašeliniště Jizerky (Northern Bohemia)]. – *Bryonora* 53: 16–26.
- Paoli L., Guttová A., Grassi A., Lackovičová A., Senko D. & Loppi S. (2014): Biological effects of airborne pollutants released during cement production assessed with lichens (SW Slovakia). – *Ecological Indicators* 40: 127–135.
- Pawlik-Skowrońska B. & Bačkor M. (2011): Zn/Pb-tolerant lichens with higher content of secondary metabolites produce less phytochelatins than specimens living in unpolluted habitats. – *Environmental and Experimental Botany* 72: 64–70.
- Petrzik K., Vondrák J., Barták M., Peksa O. & Kubešová O. (2013): Lichens – a new source or yet unknown host of herbaceous plant viruses?. – *European Journal of Plant Pathology* 138: 549–559.
