Počínaje tímto dílem Nové bryologické literatury dochází k částečné změně v koncepci excerptí a formálního uspořádání rubriky. Vzhledem ke stále rostoucímu počtu ve světě vycházejících bryologických prací budeme výběr ze světové bryologické literatury i naši bibliografii přinášet v každém čísle. Dosud vycházející rubrika „Česká a slovenská bryologická bibliografie“ bude transformována do několika podrubrik Nové bryologické literatury a budou v ní publikovány pouze práce vycházející v České nebo Slovenské republice.
